

Position: Associate Developer, Permanent full-time

Start Date: June 2010

Headquartered in Toronto, Canada, with operations in the U.S., and U.K, Angoss helps clients grow revenues and reduce risk using powerful predictive analytics and data mining software that unlock actionable knowledge from customer data. Angoss increases the intelligence of marketing, sales, and risk activities for some of the world's largest financial services, telecom and technology companies including HSBC, Citigroup, JP Morgan Chase, GE Money, Vodaphone, T-Mobile, and in Canada, Research in Motion, Bell Canada, Rogers Communications, and CT Financial. Angoss helps these and other companies discover patterns amongst customer activity, predict the impact of their marketing, sales and risk strategies, and act on this insight with actionable, predictive rules that generate improved business performance. Angoss is listed on the Toronto Venture Exchange under the symbol "ANC" and has been operating since 1984. For more information regarding Angoss Software Corporation, visit www.angoss.com.

We have a welcoming culture and a reputation for accountability and innovation. Our diverse projects, fun environment and passion for our customers will enable you to contribute your ideas, affect change and grow your personal sphere of influence.

Position Mandate

Reporting to the Director, Software Development, you will work as part of the Angoss R&D group, a team that delivers all of Angoss' software products. You will participate in all aspects of the development lifecycle, from requirements through implementation to testing and ongoing support.

This is an entry level position with lots of room to take on additional responsibility and move your career forward. You will be an integral part of the team, and will be expected to deliver high quality solutions. This role is about more than just coding. You will also work on database development, data manipulation, UI designs, client projects and internal tools and systems.

Key Responsibilities

- Work with senior developers and architects to design and develop new product features across multiple product lines (80%)
- Test and support QA activities for new and existing products (10%)
- Assist the client services team on client engagements to deliver custom solutions on time and on budget. (10%)

Required Skills & Qualifications

- Bachelors Degree required, preferably in Computer Science or Software Engineering. Math and statistics proficiency is also a plus.
- 1-3 years of practical experience in work terms or full time employment
- Working knowledge of relational databases, ETL processes, and reporting, preferably in Microsoft SQL Server (SSIS, SSRS)
- Web application development experience with C# and Microsoft .NET
- Strong problem solving and quantitative analysis abilities.
- Excellent communication abilities

Desired Qualifications and Experience

- Knowledge of analytical software (e.g. Angoss, SAS, SPSS)
- Exposure to C++ on Windows and Unix/Linux
- Experience with Oracle Database and Oracle Warehouse Builder tools
- Web development experience working with Java/J2EE

Applications

Applicants should apply by submitting the following to careers@angoss.com. In the "Subject" field specify "Angoss Careers: Associate Developer"

- Cover Letter
- Resume
- University Transcript (Official or Unofficial)

References

Applicants will be expected to provide suitable references from current or former employers upon request.
